

Goshen South Wind Energy Facility Economic Benefits

Job Creation

The Goshen South wind energy facility will create hundreds of jobs during project construction and start-up. Past experience has shown that approximately ten ongoing operations and maintenance jobs are created per 100 MW of installed capacity.

Tax Revenues

The wind energy facility will provide an average of more than \$1 million per year in tax revenue to Bingham County assuming all 150 turbines are constructed.

The total value of this tax revenue over 30 years ranges from \$24 million to more than \$100 million, depending on the electricity generating capacity of the project.

These revenues can be used to improve County services or reduce County tax rates.
